

Cyber Security & Virtual CISO Services

SECURITY OPERATIONS | SECURITY RISK ANALYSIS & MANAGEMENT | POST-INCIDENT ANALYSIS

Virtual CISO Services

As a security subject matter expert, we take an active role in security projects to provide best-of-breed solutions ensuring a balanced yet appropriate level of security posture and risk management.

- ▶ Easy access to security expertise
- ▶ Specialized knowledge
- ▶ Immediate value

Advisory service is offered to improve security in working and organizational processes, to select the right security technologies, tools and personnel and to develop security operations capabilities.

INTERNAL INFORMATION SECURITY STANDARDS & GUIDELINES

- ▶ The internal security standards prevent cyber incidents, improve security culture and operational functioning of the company.
- ▶ They are intended for the organizations that want efficient, customized security standards, including checklists for the employees.
- ▶ The development of the customized internal security standards is based on the experts' risk identification.

PRACTICAL SECURITY COURSES AND HANDS-ON TRAININGS

Specialized courses, focused on the immediate knowledge transfer to learners. The transfer of knowledge is based on solving practical examples.

INFORMATION SECURITY FOR MANAGERS

Intended for managers and executives of the companies operating in global markets, as well as for corporate security professionals.

ATTACK MODELING AND ANALYSIS OF UNWANTED SCENARIOS

Attack modeling is an important method to find weak security points. It is crucial for raising awareness about the real situation that could happen to us. The course will present practical examples, resulting from the analysis of recent cyber attacks.
